The extra absorbing power is needed during drought or when a portion of the root system ceases to function because of disease.

Roots need air – they respire (use oxygen) just as the above ground portion of the plant. When the oxygen supply is cut off, roots die or are severly damaged. Air gets to the roots through soil pore space. This is the important reason to avoid soil compaction.

Some growers report barley 8 - 10 inches tall and falling down. Best approach is to use a hot wire and graze to 3 inches,

* * *

Some barley is quite yellow. We looked at several fields last week. Some disease is present on some plants.

CARAVELLE®
is made like an expensive watch.

Yet it's only $10.95.

That's because Bulova waited years until they could make a good $10.95 watch. One with a jeweled-lever movement, unbreakable mainspring, precision fitted parts. A watch that's shock-resistant, and waterproof*, too. The result is the Caravelle by Bulova. A very expensive watch for only $10.95.
